# Dorian Wojda

**Senior Full-Stack Engineer · Berlin**

## PROFILE

I build digital products from idea to live operation. Currently I own a patient management platform used by a speech therapy practice group across Germany – built with TypeScript, NestJS, React and AWS/Terraform. Specialised in HealthTech and regulated software (German medical-software requirements, GDPR-compliant health data). With a degree in business informatics I think technology and business together: strong product thinking and an eye for the economic value of every solution.

**14+**
years frontend

**5+**
years full-stack

**10+**
companies & clients

## EXPERIENCE

Aug 2024 – present
### Senior Full Stack Engineer
Palabra Praxisgruppe GmbH · Berlin · Hybrid

Product engineering for a patient management platform: clarify requirements with operations and management, plan, build and roll out. Technically in the three-person core team with additional freelancers.

Mar 2020 – Oct 2024
### Freelance Full-Stack Developer
Self-employed · Berlin · Hybrid

Full-stack and product work for SMEs and start-ups: process digitalisation, platform development and integrations.

- Gebrüder Saleh – booking platform
- Beglau Wärmepumpen – IoT
- ServiceHero – marketplace
- getquin – product manager for a 7-person dev team

Nov 2018 – Jan 2021
### IT Consultant
Netlight · Berlin

Software consultant in client teams of large German e-commerce and platform companies.

- kfzteile24 – Software Engineer / DevOps
- ImmoScout24 – web developer, React relaunch

Jan 2016 – Oct 2018
### Software Developer
YOC · Berlin

Rich-media ad formats for mobile web and in-app; advice on technical feasibility, roadmap planning and ad-tech standards (OpenRTB, VAST, VPAID, MRAID, Prebid.js).

Aug 2013 – Jan 2016
### Working student
Berlin University of Applied Sciences (BHT)

Development of online learning tools with d3.js, JavaScript, HTML and CSS.

## WHAT I BRING

- Product thinking: strategic requirements → pragmatic solutions
- Integrating AI tools into the development process and beyond
- Architecture & implementation of cloud-native applications
- Full-stack TypeScript for backend, frontend and admin tools
- Process automation & integrations
- Close collaboration with product, operations and Scrum teams

## EDUCATION

**B.Sc. Business Informatics**
University of Rostock · 2012–2016

## SELECTED PROJECTS

PALABRA PRAXISGRUPPE · SINCE 2024

### Patient management platform (HealthTech)

- Product ownership from idea to production
- Architecture on AWS with Terraform, full CI/CD pipeline in GitLab
- Authentication with AWS Cognito, role-based access (RBAC)
- German medical-software requirements, GDPR-compliant health data
- Reporting & analytics dashboards in Metabase

NestJS · React · React-Admin · PostgreSQL · AWS · Terraform · Cognito · GitLab CI/CD · Claude Code · Custom Claude Skills

GEBRÜDER SALEH · 2020–2024

### Booking platform for interpreters

- Product ownership for the entire booking platform
- Automatic notifications & confirmations via Twilio and WhatsApp
- Automatic generation of PDF templates according to official requirements
- Auth0/JWT, containerised deployment

NestJS · React · Prisma · GCP · Docker

BEGLAU WÄRMEPUMPEN · 2020–2024

### Smart-home control for heat pumps (IoT)

- Product ownership for the control interface – from concept to deployment
- Web interface running on Raspberry Pi / Linux devices directly at the heat pump; Siemens Simatic controllers connected via JSON-RPC & MQTT
- Flows in Node-RED, UI built to Figma specifications
- Secure infrastructure at Hetzner with Fast Reverse Proxy and Caddy

React · MQTT · Node-RED · Raspberry Pi · Hetzner · Caddy

SERVICEHERO · 2021–2023

### Pest control marketplace

- Product ownership including project management and DevOps
- Serverless on AWS with Terraform, later GCP
- HubSpot CRM & MessageBird for leads and customer communication
- UI built to Figma specifications, automation of flexible workflows

React · Next.js · Node.js · AWS · HubSpot

KFZTEILE24 VIA NETLIGHT · 2019–2021

### Warehouse logistics as microservices

- Product ownership for the scanner software: requirements, on-site coordination in the warehouse, rollout, testing and follow-up after feedback
- Migrated a 20-year-old legacy project to a modern microservices infrastructure on AWS – planned and implemented key parts of the software as project owner

C# / .NET Core · Entity Framework · PostgreSQL · SNS/SQS · Terraform · CI/CD

## SKILLS

**FRONTEND**

TypeScript, React, React-Admin, Next.js, CSS, Responsive Design, Redux, Storybook, Figma

**BACKEND**

NestJS, Node.js, PostgreSQL, Kysely, Prisma, C# / .NET Core, Auth0 / JWT

**CLOUD & DEVOPS**

AWS (ECS, EC2, SNS/SQS), Terraform, GCP, Docker, CI/CD, Sentry, Linux, Caddy, Fast Reverse Proxy, DNS

**INTEGRATIONS & DATA**

Twilio, WhatsApp Business API, HubSpot, MQTT, Node-RED, n8n, Claude Code, Metabase, Optica
